## 2010 FLW Tour

### 2010 Forrest Wood Cup Preview

Lake Lanier, Atlanta, Ga.

Lake Lanier has seen its struggles over the last few years with low water levels, but the water level has been rising and the lake should be in great condition for the world championship of bass fishing...the advantages of the low water recently allowed for small trees and grass to grow in areas traditionally covered in water and is now in six to 10 feet of water...spotted bass have traditionally been the choice in recent past, but with the additional vegetation, largemouths could become a factor...visit [ForrestWoodCup.com](http://ForrestWoodCup.com) for complete details and a schedule of events.

Location: Lake Sidney Lanier is located in the foothills of Georgia's Blue Ridge Mountains.  
History: Lake Lanier was constructed in the 1950s by the U.S. Army Corps of Engineers.  
Size: Lake Lanier features more than 692 miles of shoreline.
